

# Brett Harte

3D Artist | Animator | Interactive Media

(267) 997-1876 · [brett.s.harte@gmail.com](mailto:brett.s.harte@gmail.com) · [linkedin.com/in/brettharte](https://www.linkedin.com/in/brettharte) · [brettharte.com](http://brettharte.com)

---

3D Artist and Animator with 10+ years of professional experience across real-time 3D, interactive media, immersive experiences, and animation. Experienced across the full 3D pipeline including modeling, rigging, keyframe animation, simulation, and Unity implementation. Strong background in Blender and Unity with additional experience developing AR/VR experiences and technical workflows for real-time applications.

---

## EXPERIENCE

### **Ninja Kiwi** — *Senior Animator & Rigger* 2025 – 2026

- Owned the full character pipeline across Blender and Unity, including modeling support, rigging, skinning, animation, FBX export, engine integration, and playtesting.
- Created and implemented production-ready character animation while working within real-time engine and gameplay constraints.
- Collaborated with artists and engineers to troubleshoot technical issues and maintain animation quality throughout the production pipeline.
- Supported and trained artists on Blender, rigging, animation export, Unity implementation, and character workflow best practices.

### **Big Owl** — *3D Animator & Rigger* 2024 – Present

- Model, rig, texture, and animate 3D characters, props, and environments in Blender for commercial and entertainment productions.
- Create simulation-driven animation and VFX, including water, particles, lighting, and procedural workflows while balancing visual quality with production constraints.

### **AECOM** — *Interactive Media Specialist* 2016 – Present

- Lead development of interactive and immersive media combining 3D content, animation, AR/VR, graphic design, and real-time technology.
- Developed a Microsoft HoloLens AR experience allowing users to interact with digitally scanned 3D artifacts through gesture and voice-based interactions in a virtual museum environment.
- Lead 3D modeling and animation for interactive installations and public-facing experiences for clients.

### **Drexel University** — *Research Assistant* 2016 – 2017

- Created 3D assets for interactive VR academic environments using Maya and Blender as part of a multidisciplinary research team.
  - Worked with Perception Neuron motion capture suit for interactive research applications and character animation workflows.
- 

## SKILLS

**3D:** Blender, Maya — Modeling, Rigging, Character Animation, Props, Cameras

**Real-Time:** Unity, Unreal Engine — Asset Integration, Animation Implementation, Playtesting

**VFX & Simulation:** Water, Cloth, Dynamics, Particles,

**Interactive/XR:** AR/VR Development, Microsoft HoloLens

**Adobe:** Photoshop, Illustrator, InDesign, After Effects, Premiere Pro

---

## EDUCATION

**Drexel University** — *MS, Digital Arts*

**Penn State University** — *BA, New Media*
